Delft, The Netherlands

OBJECTIVE

Ph.D. candidate in applied mathematics, nearing completion of my doctorate, specializing in high-dimensional statistics, random matrix theory, and Bayesian learning. My research develops theoretical foundations for modern inference problems, with applications ranging from signal recovery and generative modeling to complex high-dimensional data. I am seeking a research position where I can continue developing rigorous statistical methodology while connecting theory with challenging problems in machine learning and data science.

EDUCATION

- **TU Delft** 2022-Dec 2026
Ph.D in applied mathematics with a focus on high-dimensional statistics. Delft, Netherlands
 - Research on statistical modeling, signal recovery, and phase transitions in high-dimensional random matrix models.
- **ETH Zürich** 2019-2022
MSc. in Data Science. Zürich, Switzerland
 - GPA: 5.25/6.00
 - Relevant modules: Advanced Machine Learning, Advanced Algorithms, Optimization for Data Science.
- **EPFL** 2016-2019
BSc. in Communication Systems. Lausanne, Switzerland
 - Grade: 5.35/6.00
 - Relevant Modules: Machine Learning, Algorithms, Theory of Computation, Probabilities and Statistics.
- **Lycée du Grésivaudan** 2013-2016
Baccalauréat scientifique option Mathematics. Meylan, France
 - Obtained with the Highest distinction

RESEARCH PROJECTS

- **Master thesis: [Reduction of convex programming]** 2021
theoretical work
 - Proposed a reduction from constrained convex optimization to unique sink orientations (USO) of hypercubes, improving theoretical complexity bounds.
 - Achieved significant improvements in run-time complexity for high-dimensional optimization problems, including computing the smallest enclosing ball of a point set.
- **Bachelor thesis: [Spectral approximation of graphs]** 2019
theoretical work with practical implementations
 - Spectral approximation of large graphs with smaller ones and its impact on clustering.
 - Implemented spectral approximation algorithms, processing network data

SKILLS

- **Programming Languages:** Python , R , C , Java , Scala with a focus on parallelism and concurrent programming
- **Research Skills:** Guarantees for machine learning
- **Mathematical & Statistical Tools:** Random matrices, High-dimensional probability, Machine Learning, Statistics
- **Data Science & Machine Learning:** Deep learning, Bayesian learning

ADDITIONAL INFORMATION

Languages: French (Native), English (Full Professional Proficiency), Spanish (Limited Professional Proficiency)
